PROFILE

Data Science student at Sherubtse College with strong interest in artificial intelligence and data-driven problem solving. Skilled in Python, machine learning, and data analysis, with hands-on experience in academic projects such as fake news detection and sign language recognition. Demonstrates strong analytical thinking and a passion for exploring emerging AI technologies. Seeking opportunities to apply technical skills to real-world challenges.

WORK EXPERIENCE

Internship at BOB

2025 -2026

Human Resources(HR) section

- Conducted comprehensive HR data analysis, and attrition trend analysis to support data-driven decision-making.
- Built analytical models and dashboards in Excel and Python to visualize trends, automate transfer matching, and improve HR operational efficiency

Projects

2026

AI-Driven stock price prediction, recommendation and investors assistant system.

- This project aimed at improving financial decision-making with the integrated prediction recommendation and financial advisory system in single platform.
